

The Real Number System Study Guide

All problems should be completed WITHOUT a calculator.

Perfect Squares	<p>To square a number, multiply that number by itself.</p> $4^2 = 4 \times 4 = 16$ <p>WARNING: The exponent of 2 does NOT mean to multiply by 2. Instead, it means to use the number twice in multiplying.</p> <p>A perfect square is the result of squaring a whole number.</p>
------------------------	--

Square Roots of Perfect Squares	<p>The inverse of squaring a number is taking the square root.</p> $\sqrt{16} = 4, \text{ because } 4 \times 4 = 16$ <p>The square root of a perfect square will <i>always</i> be an integer.</p> <p>Taking the square root of a positive number will give two possible roots: one positive and one negative.</p> $\sqrt{16} = 4, \text{ because } 4 \times 4 = 16$ $\sqrt{16} = -4, \text{ because } -4 \times -4 = 16$
--	---

Fill in the charts below:

Perfect Squares:

1 ²	2 ²	3 ²	4 ²	5 ²	6 ²	7 ²	8 ²	9 ²	10 ²	11 ²	12 ²	13 ²	14 ²	15 ²	16 ²	17 ²	18 ²	19 ²	20 ²	

Square Roots of Perfect Squares:

$\sqrt{\quad}$	$\sqrt{\quad}$	$\sqrt{\quad}$	$\sqrt{\quad}$	$\sqrt{\quad}$	$\sqrt{\quad}$	$\sqrt{\quad}$	$\sqrt{\quad}$	$\sqrt{\quad}$	$\sqrt{\quad}$
1	2	3	4	5	6	7	8	9	10

$\sqrt{\quad}$	$\sqrt{\quad}$	$\sqrt{\quad}$	$\sqrt{\quad}$	$\sqrt{\quad}$	$\sqrt{\quad}$	$\sqrt{\quad}$	$\sqrt{\quad}$	$\sqrt{\quad}$	$\sqrt{\quad}$
11	12	13	14	15	16	17	18	19	20

Square Roots of Fractions	<p>Take the square root of the numerator and the square root of the denominator.</p> $\sqrt{\frac{1}{9}} = \frac{\sqrt{1}}{\sqrt{9}} = \frac{1}{3}$								
Solving One-step Equations with Square Roots	<p>The inverse of squaring a number is _____.</p> <p>Example: solve $x^2 = 121$</p> <p>Answer: _____</p>								
Solving Multi-step Equations with Square Roots	<p>A "Do/Undo" chart can help decide the order of steps to take.</p> <p>Example: solve $x^2 + 4 = 229$</p> <div style="display: flex; align-items: center; justify-content: center;"> <div style="text-align: right; padding-right: 10px;"> <p>List what is being done to x using Order of Operations</p> </div> <div style="text-align: center; padding: 0 10px;">  </div> <table border="1" style="border-collapse: collapse; text-align: center;"> <thead> <tr> <th style="padding: 5px;">Do</th> <th style="padding: 5px;">Undo</th> </tr> </thead> <tbody> <tr><td style="height: 20px;"> </td><td> </td></tr> <tr><td style="height: 20px;"> </td><td> </td></tr> <tr><td style="height: 20px;"> </td><td> </td></tr> </tbody> </table> <div style="text-align: left; padding-left: 10px;"> <p>What is the inverse operation?</p> </div> </div> <p>Answer: _____</p>	Do	Undo						
Do	Undo								
Area of Squares	<p>To find the area of a square, multiply one side length by itself.</p> <p>To find the side length, take the square root of the area.</p> $\text{side length}^2 = \text{Area}$ $\sqrt{\text{Area}} = \text{side length}$								

Perfect Cubes	<p>To cube a number, use that number in multiplication 3 times.</p> $4^3 = 4 \times 4 \times 4 = 64$ <p>WARNING: The exponent of 3 does NOT mean to multiply by 3. Instead, it means to use the number three times in multiplying.</p> <p>A perfect cube is the result of cubing a whole number.</p>
----------------------	--

Cube Roots of Perfect Cube	<p>The inverse of cubing a number is taking the cube root.</p> $\sqrt[3]{64} = 4, \text{ because } 4 \times 4 \times 4 = 64$ <p>The cube root of a perfect cube will <i>always</i> be an integer.</p> <p>Watch out for the little 3 above the sign. It tells us to use cube root instead of square root.</p>
-----------------------------------	---

Fill in the charts below:

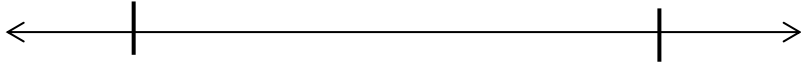

Perfect Cubes:

1^3	2^3	3^3	4^3	5^3	6^3	7^3

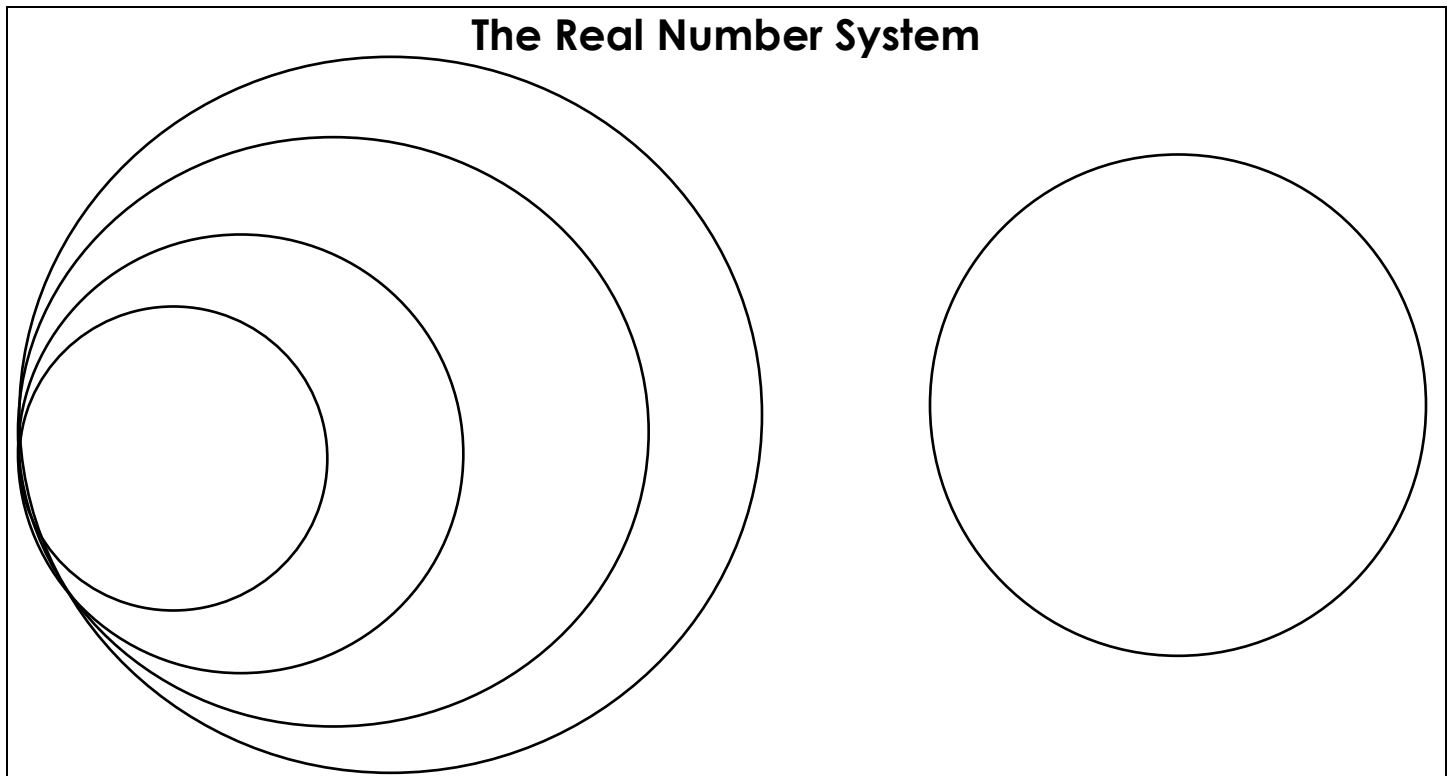

Cube Roots of Perfect Cubes:

$\sqrt[3]{\quad}$	$\sqrt[3]{\quad}$	$\sqrt[3]{\quad}$	$\sqrt[3]{\quad}$	$\sqrt[3]{\quad}$	$\sqrt[3]{\quad}$	$\sqrt[3]{\quad}$
1	2	3	4	5	6	7

Volume of Cubes	$\text{side length}^3 = \text{Volume}$ $\sqrt[3]{\text{Volume}} = \text{side length}$
------------------------	---

Converting Fractions and Decimals	<p>Fraction → Decimal: divide _____ by _____.</p> <p>Decimal → Fraction: put decimal over 1, then multiply numerator and denominator by 10 until decimal is gone.</p> <ul style="list-style-type: none"> • Another method: use the place value of the last digit <ul style="list-style-type: none"> ○ 10ths place → put number over 10 ○ 100ths place → put number over 100 ○ 1,000ths place → put number over 1,000
Converting Repeating Decimals to Fractions	<p>If the repeating bar is over ALL digits after the decimal: Convert $0.\overline{6}$</p> <p>If the repeating bar is NOT over all digits after the decimal: Convert $0.4\overline{9}$</p>
Estimating Non-Perfect Square Roots and Cube Roots	<p>Estimate $\sqrt{34}$ to the nearest 10th.</p> <p>Use a number line to decide which two integers the root should fall between.</p> <div style="text-align: center;">  </div> <div style="display: flex; justify-content: space-around; margin-top: 10px;"> <div style="text-align: center;"> <p>Guess and Check</p> <p>(works for square roots and cube roots)</p> </div> <div style="text-align: center;"> <p>Shortcut (only for square roots)</p> </div> </div>

Rational Numbers	<p>Rational numbers are numbers that can be written as a fraction of 2 integers.</p> <p>Rational numbers can include:</p> <ul style="list-style-type: none"> • _____ and _____ decimals • The square roots of _____ • The cube roots of _____
Irrational Numbers	<p>Irrational numbers cannot be written as a fraction of 2 integers.</p> <p>Irrational numbers include:</p> <ul style="list-style-type: none"> • _____ and _____ decimals • The square roots of _____ • The cube roots of _____
Pi (π)	<p>Pi represents the ratio of a circle's circumference to its diameter.</p> <p>π is a _____ and _____ decimal, which makes it a(n) _____ number.</p> <p>π is approximately 3.14.</p>

Homework: You may want to do your work on a separate piece of paper.

<p>1) Tara cut out a square piece of paper with an area of 200 square inches. Which expression could be used to find the side length of the paper?</p> <p>a. $200 \div 4$ b. $\sqrt{200} + 4$ c. $200 \div 2$ d. $\sqrt{200}$</p>	<p>2) What is the solution to $x^2 = 196$?</p> <p>a. $x = 13$ or $x = -13$ b. $x = 98$ or $x = -98$ c. $x = 14$ or $x = -14$ d. $x = 392$ or $x = -392$</p>
<p>3) Which expression has a value of 11?</p> <p>a. $\sqrt[3]{14}$ b. $\sqrt{5.5}$ c. $\sqrt[3]{33}$ d. $\sqrt{121}$</p>	<p>4) Which number is irrational?</p> <p>a. $\frac{7}{5}$ b. $-5.\overline{87}$ c. $\sqrt[3]{64}$ d. $\sqrt[3]{80}$</p>
<p>5) Which choice has a rational value?</p> <p>a. $\sqrt{2}$ b. $\sqrt{\frac{2}{5}}$ c. $\sqrt{\frac{25}{9}}$ d. $\sqrt[3]{4}$</p>	<p>6) Which set of numbers are ALL rational?</p> <p>a. $\pi, \frac{1}{8}, -12$ b. $-5.234, 2.\overline{34}, 6\sqrt{2}$ c. $\sqrt[3]{125}, 45, -\frac{8}{9}$ d. $\sqrt{36}, \pi^2, 0.7$</p>
<p>7) Which value is closest to $10\sqrt{40}$?</p> <p>a. 6 b. 30 c. 60 d. 400</p>	<p>8) Estimate $\sqrt{76}$ to the nearest 10th.</p>
<p>9) Between which pairs of numbers is $\sqrt{149}$?</p> <p>a. 11 and 12 b. 144 and 169 c. 74 and 75 d. 12 and 13</p>	<p>10) Between which two consecutive points does $\sqrt[3]{131}$ lie?</p> 
<p>11) Which integers, when placed in the blanks below, make the inequality true?</p> <p style="text-align: center;">_____ < $-\sqrt{44}$ < _____</p> <p>a. 6 and 7 b. 7 and 8 c. -7 and -6 d. -8 and -7</p>	<p>12) How much greater is $\sqrt{17}$ than $\sqrt{7}$?</p> <p>a. Exactly 10 b. Exactly 1 c. A little more than 1 d. A little more than 3</p>
<p>13) To which set of numbers does $3.\overline{2}$ belong?</p> <p>a. Rational only b. Irrational only c. Rational and an integer d. Irrational and an integer</p>	<p>14) To which set of numbers does $-\sqrt{23}$ belong?</p> <p>a. Rational only b. Irrational only c. Rational and an integer d. Irrational and an integer</p>
<p>15) Which exponent can be substituted for x to make the equation true?</p> <p style="text-align: center;">$12^x = 144$</p>	<p>16) What is $1.\overline{4} + 2.2\overline{3}$?</p>
